PROFILE

My digital career began in 1997 across multimedia, design and interactive experiences. Over a decade in frontend development has shaped my focus on responsive, accessible interfaces and thoughtful user experiences.

Alongside full-time parent caring and SEND advocacy, I develop independent web and native applications, combining creative problem-solving with practical engineering.

RECENT EXPERIENCE

AUG 2026 – PRESENT

Independent Software Developer

Self-employed · Widnes / Remote

Take applications from concept through design, development, testing and release. Current work includes AAAudits Pro, an accessibility auditing tool, and A/B Tekniq, a native DJ app.

Draw on JavaScript, React, Tailwind and Jest, with growing SwiftUI and WebKit experience. Use AI-assisted workflows with usability and maintainability at the centre.

FEB 2024 – PRESENT

Parent carer & SEND advocate

Caregiving · Career break · Halton

Provide full-time care and SEND advocacy for my family. Coordinate evidence and EHCP processes across education, health and local-authority services. Strengthened stakeholder communication, prioritisation, resilience and problem-solving through complex, high-pressure situations.

Experience with perspective.

02 / SELECTED WORK

A/B Tekniq

Native DJ app for preparation, two-deck mixing and transition planning; supported by a dedicated website.

View project

AAAudits Pro

Website auditing with first-party checks, local evidence and reviewable reports.

View project

StageSafeUK

Coordination platform bringing together SvelteKit, Laravel and MySQL.

View project

Local Meeting Assistant

Local meeting capture, transcription and source-linked review.

View project

CREATIVE PRACTICE

Music production as SYSTEM 174, visual effects and audio-reactive creative tools.

PROFESSIONAL EXPERIENCE

NOV 2020 – JAN 2024

Senior Frontend Developer

Yodel

Developed React and Redux features in an agile squad modernising business operations. Translated designs into functional interfaces and built reusable components and utilities with TypeScript, Jest, SCSS and REST APIs.

NOV 2019 – OCT 2020

React UI Lead Developer

LMS · Legal Marketing Services

Led frontend work for innovation projects, developing React UI components and collaborating with agile teams on new features and existing products. Helped streamline delivery through consistent development practices.

JUL 2017 – NOV 2019

Frontend Developer

Intechnica · Pets at Home eCommerce

Led frontend development for the Pets at Home eCommerce platform. Built modular solutions within legacy architecture and improved site performance.

EDUCATION & QUALIFICATIONS

BTEC HNC Multimedia & Software Development
BTEC National Diploma IT Applications
NVQ Level II Software Development
NVQ Level II Business Administration
